Journal of Hydrology 172 (1995) 391–392

Journal of Hydrology

Contents

Editorial Comment

Research in hydrologic science in the USA
D.R. Maidment 1

NSF research in hydrologic sciences
L.D. James 3

On the establishment of a US national center for hydrologic research and technology transfer
K.P. Georgakakos 15

Research Papers

The influence of flow rate on the concentration of indigenous and applied solutes in mole-pipe drain effluent
G.N. Magesan, R.E. White and D.R. Scotter 23

Solute and isotopic geochemistry and ground water flow in the central Wasatch Range, Utah
A.L. Mayo and M.D. Loucks 31

Validation of an inverse numerical model for interpretation of pumping tests and a study of factors influencing accuracy of results
L. Lebbe and W. De Breuck 61

Distributed parameter hydrology model (ANSWERS) applied to a range of catchment scales using rainfall simulator data I: Infiltration modelling and parameter measurement
D.M. Silburn and R.D. Connolly 87

Distributed parameter hydrology model (ANSWERS) applied to a range of catchment scales using rainfall simulator data II: Application to spatially uniform catchments
R.D. Connolly and D.M. Silburn 105

On the residence time distribution in idealized groundwatersheds
H.M. Haitjema 127

Äspö, SE Sweden: a natural groundwater flow model derived from hydrogeochemical observations
J.A.T. Smellie, M. Laaksoharju and P. Wikberg 147

A field-scale, natural gradient solute transport experiment in peat at a Newfoundland blanket bog
R.S. Hoag and J.S. Price 171

Isotopic composition of precipitation in central Iowa
W.W. Simpkins 185

Controls on the major ion chemistry of the Ürümqi River, Tian Shan, People's Republic of China
M.W. Williams, D. Yang, F. Liu, J. Turk and J.M. Melack 209

Time to equilibrium for spatially variable watersheds
B. Saghafian and P.Y. Julien 231

Modeling measurement errors when estimating snow water equivalent
S.S. Carroll 247

Measurement of plant and soil water isotope composition by direct equilibration methods
C.M. Scrimgeour 261

Radar rain field evaluation and possible use of its high temporal and spatial resolution for hydrological purposes
J. Morin, D. Rosenfeld and E. Amitai 275

The chemistry and origin of groundwater in Triassic sandstone and Quaternary deposits, northwest England and some UK comparisons
R.T. Kimblin 293

Linear reservoir with feedback regulated inlet as a model for the infiltration process
M.H. Diskin and N. Nazimov 313

A physically based model for mobilization of kaolinite particles under hydraulic gradients
R.S. Govindaraju, L.N. Reddi and S.K. Kasavaraju 331
Two early Russian contributions to the theory of the stochastic reservoir
V. Klemeš 351
A method for runoff control computation
A.D. Savarenskiy 355
Generalized methods for runoff control computations based on mathematical statistics
S.N. Kritskiy and M.F. Menkel 365

Discussions
The influence of storm temporal patterns on catchment response–Comment
A. Ben-Zvi 379
The influence of storm temporal patterns on catchment response–Reply
J.E. Ball 381

Technical Note 383

Erratum 385
